LEGAL PLATFORM — CAIRO, EGYPT

Abdallah Yasser

AI STUDENT & DEVELOPER

[SCROLL](#)

About

Second-year AI student at Zewail City of Science and Technology, and the sole developer behind **Legal Platform** — a comprehensive Arabic legal-tech SaaS built entirely from scratch, featuring multi-role authentication and dashboards, legal consultations, contract management, and an AI-powered judicial decisions assistant, built on **Supabase** and **Edge Functions** to serve individuals, lawyers, and companies across the Arabic-speaking market.

I turn complexity, legal or technical, into simple systems that simplify operations across any field or industry, for companies of any size or category.

Skills

Frontend

- HTML / CSS / JavaScript
- React

Backend & Database

- Supabase (DB, Auth, Storage)
- Edge Functions
- Row Level Security (RLS)
- Firebase Auth
